

# SAMICK DIGITAL

## Samick DCP-8 Digital Piano

The DCP-8 features eight voices, full 88-note weighted hammer action keyboard, stereo speaker system, two headphone outputs, line in/out, USB, and bench. The DCP-8 is packed with powerful features and functions that add another dimension to the instrument.

For instructional teaching, the DCP-8 is able to be split in two with the same piano sound played in both halves by teacher and student. Two headphone sockets are provided to enable any practicing (alone or with a teacher) to take place in privacy.

In addition, the DCP-8 has far more connection options than any other digital piano in its class. Whether you want to connect an MP3 player, external sound system, expand your system with additional MIDI equipment or simply connect a computer for use with music software, the DCP-8 has the connection points required. With a performance that rivals name brands, the DCP-8 is an obvious choice for anybody on a budget.

Hear it, play it. It speaks for itself.

### Product Specifications
