

# SAMICK DIGITAL

## Samick SSP-12 Digital Classical Piano

The Samick SSP-12 has been designed to offer a new choice for the church and hymn players with a wide variety of pipe, piano, and orchestral sounds, with the touch and response that experience piano players expect — all of this in a small and compact portable cabinet.

On power up the SSP-12 offers a selection of ten Pipe Organ sounds (from Pianissimo to Fortissimo) providing the perfect solution for all the most popular Pipe Organ sound registrations. At a touch of a button the instruments can be turned into a modern Digital Piano with all the most advanced sounds and features of this type of product.

The instrument incorporates over 480 sounds including, of course, the latest high-quality Stereo Grand Piano sound.

The 88 note Hammer-Action keyboard, the Multi Layers sampling technology and the new Touch-Sensitivity control system ensure the best control of the piano sound and the absolute authenticity of touch with the quality and the feel of a grand piano.

The built-in USB disk can be used to record musical data. You can also use a USB flash drive to play back a huge array of commercially available liturgical, gospel, and praise and worship Standard MIDI Files (SMF's).
